PERRY, OHIO
Our Profit-Sharing Plan

For each $10 you send us you may choose $11 worth of stock

It is proportionately cheaper to pack a large order than a small one, and on the larger ones we want you to have the benefit of oursavings. This plan does not include, however, our special offers, as items in them have already undergone a discount. They are arranged for your convenience for a definite planting. By our Profit Sharing Plan you may arrange your own planting plan, choose items from any department in the catalog, and get them at almost as low a price as the special offers. This offer does not apply to orders for less than $10.

Directions to Customers

ORDER EARLY. We try to fill all orders immediately, but from March to May slight delays are unavoidable, which, however, can be largely overcome by our patrons anticipating their wants and ordering early.

SHIPPING. We ship all orders by Express Collect unless told to ship some other way. If we decide to ship by Parcel Post we will prepay the charges. However, larger plants and shrubs can be furnished and more care is taken to prevent freezing if shipped by Express, so for most shipments, that method is best.

PACKING. No charge is made for boxes or packing on Express or Freight shipments nor for delivery to Freight Depot or express office in Perry.

SAFE ARRIVAL OF PACKAGES. We guarantee the safe arrival of all goods sent by Express to points within the United States. If a package sent by Express or Mail is injured or lost we will replace it as soon as we are informed of the fact. Goods sent any other way are solely at purchaser’s risk. Claims for damages must be made on receipt of goods.

ERRORS. In the press of business, errors sometimes occur, in which event we wish to be promptly notified of the fact, and will make such corrections as will be satisfactory. Please keep copy of all your orders for comparison.

CASH WITH ORDER. Please send money with the order sufficient to cover the whole bill. We cannot send goods “Collect on Delivery” unless remittance is made on account to guarantee acceptance.

REMITTANCES should be made by P. O. Money Order, Express Money Order or Draft on Cleveland or New York Banks. We are not responsible when they are made otherwise.

NAME AND ADDRESS. Please remember to write on each order your NAME, POST OFFICE, COUNTY and STATE; also give street and number, post office box or R. F. D. plainly; also the nearest EXPRESS OFFICE.

NON-WARRANTY. Most of the failures with plants and shrubs are due to causes entirely beyond our control, hence it is impossible for us to guarantee success, and although we take all possible care to supply only such goods as will, under proper conditions, produce satisfactory results, we will give no warranty as to description, quality or productiveness of any of the plants, shrubs or bulbs we send out, and will not be in any way responsible for the crop.

LOCATION. To find our nurseries—go east from Painesville or west from Ashtabula on State Route 84. Our nursery is on the south side of the road about 4 miles east of Painesville and 6 miles west of Madison in Perry township. A large sign with our name on it will help you find it.

Northern Ohio is so centrally located that freight and express shipments to all parts of the country is prompt and convenient. We ship all stock from Perry, Ohio and our mail is sent from that Post Office.

It's Serious Business to Have Your Picture Taken

You know, I laughed more when I saw this picture than I could possibly do when it was being taken. The fact is, I feel more at home in work clothes and when I get dressed up it affects my face seriously.

We Want You To Get Results

We are interested that you make a success of whatever you buy from us. We are not entirely unselfish in the matter, either, because if you are pleased you will tell your friends and thus perhaps they will become our friends as well.

By careful descriptions in this book and notes on planting and care of plants we try to help you. By definite layouts for home plantings we make suggestions which may be varied to fit your exact situation. By choosing a few varieties to be shown in colors you may gain a more definite idea of their appearance. We will try, upon your request, to answer any questions you may ask about their care.

The plants and shrubs you get from us are full size, well rooted and healthy in every way. We pack them carefully and ship them so they will arrive in first class condition. Of course we can not guarantee them to grow because that depends on you. We do guarantee that they will arrive in good condition. They will grow if you give them good growing conditions.

While hardy plants is our specialty, we are including three other departments—Hardy Ornamental Shrubs, Roses and Evergreens, for your convenience.

We are not an old firm. We have owned our own nursery for eight years, starting small and increasing the business steadily by keeping friendships with honest values and quality goods at reasonable prices; 22 years in all in handling and raising perennials. We started with the idea that "Quality will be remembered long after price is forgotten. In the nursery business as in clothing or groceries you get about what you pay for. If you buy from us this year you will buy again next year and always be our friend.

One has only to compare the barren wastes of a new allotment with a well planted lawn and garden to be convinced of the value of well arranged plants and shrubs.

The planting plans in this book are arranged to help you. It is obvious that we cannot picture the best plan for every home, but these are very adaptable plans.

Hardy Carnations supply a great need for garden cut flowers.
**Perennial Plants**

A class of hardy flowering plants that come up year after year, requiring only a little watering and cultivation to make them bloom beautifully. Some varieties should be divided every few years to prevent their roots becoming too thick.

*We grow every plant the best we know how*

**ACHILLEA** (Milfoil or Yarrow)

A pretty family of flowers that prefer dry sunny places. The dwarf varieties are used for rockeries and the tall ones for borders and also fine for cut flowers. Most of them bloom from July until October continuously.

**BOULE DE NEIGE** Densely double pure white flowers that grow about 18 inches high and bloom from July to October. A beautiful plant for the medium border and much appreciated in bouquets. Each 25c. doz. $2.50, 100 $20.00.

**FILAPENDULA** Flat heads of brilliant yellow flowers in bloom all summer. Grows 6 to 12 inches with finely cut foliage. Each 25c. doz. $2.50, 100 $20.00.

**MILLEFOLIUM ROSEO** Rosy pink flowers in dense heads. 18 inches high. Blooms from July to October. Each 25c. doz. $2.50, 100 $20.00.

How To Plant And Care For Perennials

Most perennials will do well planted about 12 inches apart. The dwarfs may be set somewhat closer and the taller varieties farther apart. Crowded plantings are never as effective as those more openly spaced. The best top soil should be sifted around the roots and firmly pressed down. Use plenty of water.

Plants often grow too rapidly for the stems they produce and hence need some support to make them shapely and effective. Early staking will help them.

Many plants will bloom almost continuously if the flowers are cut and not allowed to seed. Snipping of dried leaves, broken stems and dead flowers helps the appearance of the perennial garden.

Plants listed are hardy in varying degrees. Some positively need protection such as Tritomas, Canterbury Bells and Foxglove. Coarse strawy manure or leaves is an effective mulch when applied in late November and removed gradually in the spring as the frost leaves the ground.

Dwarf plants will usually thrive without much attention, but the taller varieties grow faster, produce heavy tops and dense roots that in one, two or three years often choke out the best qualities of the plant. They will do better if divided occasionally.

By stirring the ground occasionally with the hoe the moisture is retained. Grass cuttings may be used as a light mulch. Sprinkling in early morning or late in the evening during very hot weather is often necessary, but the ground should never be allowed to bake or form a crust around the plants. Perennial plants will reward you well for the care and attention you give them.

Table for Circular Flower Beds

The following table is offered to furnish information about planting circular beds. If plants are to be 6 in. apart, start outside row 3 in. from edge of circle; if 12 in. apart, then 6 in. from edge, etc. It is important to make the outer rows compact, although the inner rows may be more openly spaced. The table is for circular beds, but a square will require about the same number of plants. An oval bed may be compared to a diameter found by adding length to breadth and dividing by 2.

Hardy Flowering Shrubs

THERE is a wonderful satisfaction in having a nice home—there is infinitely more satisfaction, however, in having it surrounded with beautiful plants and shrubs. You have only to see a new allotment where new houses are being built and a year or two later see them surrounded with a frame of shrubbery to appreciate the value of plantings.

ALMOND Double Pink. Blooms early in the spring before the leaves are scarcely started. Each twig is lined with beautiful double pink flowers.

ROSE OF SHARON (Althea) Blooms in August and September, producing many brightly colored flowers somewhat like double Hollyhocks. Bushes often attain a height of 10 or 12 feet. Your choice of Double Rose, Double White, Double Purple, Double Red and Double Striped.

JAPANESE BARBERRY (Berberis Thunbergi) A dwarf shrub of dense growth widely used for low shrub borders. Its bright green foliage of spring changes as the season advances to a red and brown, and its red berries add a touch of beauty in the fall.

It may be trimmed to any formal shape for a hedge or walk lining.

It may be trimmed to any formal shape for a hedge or walk lining.

BUDDLEYEA (Butterfly Bush) Also known as Summer Lilac. Magnifica A magnificent shrub that bears its large violet rose flower plumes in July emitting a delightful odor. It grows quickly and is quite hardy.

SWEET PEPPER BUSH (Clethra Alnifolia) An attractive shrub that never exceeds a height of 4 or 5 feet and produces a wealth of delicate sweet scented white flowers during August and September. Ideal for front row of shrub border.

Euonymus vine is a beautiful green the year round

How To Plant And Care For Shrubs
Dig pit large and deep enough so some of the top soil can be sifted back in the bottom and still allow the shrub to be set slightly lower than it grew in the nursery row. Spread the roots out well and sift the loose soil around them, tamping it down when the roots are well covered. Finish filling the pit and tamp down thoroughly, then lay on a mulch of leaves, straw or light manure. Manure should not be used around the roots unless it is well rotted and thoroughly mixed with the soil. It is better as a mulch on top of ground around the shrub after well and sift soil occasionally to prevent baking and crustng. Given fertility, water, and proper sun exposure your shrubs will give you beautiful bloom and reward you well for their care. The soil should be kept loose around them.

Most Mall Size Shrubs Do Not Come Up To Our Standards.
Roses have long held an important place in the hearts of flower lovers. They perhaps give more real satisfaction in quality results than any other shrub. Since the development of Hybrid Tea Roses and Ever-blooming Dwarf varieties their season has been greatly lengthened and their field of usefulness broadened.

Our roses are all strong two-year budded stock with well developed roots. We ship them to our customers in a dormant state with roots and top properly trimmed, ready to plant out immediately. Roses must be carefully trimmed back each year to produce the best results.

Teas and Hybrid Teas

**BETTY UPRICHARD.** One of the newer novelty roses that has proven a winner. The outside is a blend of deep toned carmine with copper orange; the inside is a delicate salmon pink; sweetly fragrant. Each $1.20, 10 for $11.50.

**CHATEAU DE CLOS, VOUGEOT.** A very double and sweetly fragrant variety of a brilliant scarlet, shaded to a fiery red and changing to a deep crimson as the blooms expand. Each $1.00, 10 for $8.50.

**COLUMBIA.** A most pleasing shade of rose-pink. A strong, vigorous, free-blooming variety with flowers perfect in form, delightfully fragrant. Each $1.00, 10 for $9.50.

**EDEL.** Probably the best white, recently introduced with flowers exceptionally large; pure white shading to a delicate ivory at the base. It is close-centered with many petals and the outer ones roll back gracefully at the edges. Each $1.20, 10 for $11.50.

**GENERAL MacARTHUR.** A rich crimson-scarlet rose of good form. One of the best bedding varieties. Each $1.00, 10 for $9.50.

**GOLDEN Emblem.** A very satisfactory clear yellow, occasionally flaked with crimson on the outer petals; wonderfully well shaped buds and flowers on long stems, with rich glossy foliage. Each $1.00, 10 for $9.50.

**KAISERIN AUGUSTA VICTORIA.** A remarkable fragrant variety, colored pearly white with just enough lemon in the center to relieve it. Each $1.00, 10 for $9.50.

**KILLARNEY.** One of the most popular pink roses with large blooms and petals of great substance. Each $1.00, 10 for $9.50.

**LOS ANGELES.** Large brilliant pink flowers shaded with gold. One of the best Hybrid Teas. Each $1.20, 10 for $11.50.

**MADAM BUTTERFLY.** Its buds are a rich Indian red with yellow at the base that open delicately shaded blooms that show tints from white, pink, apricot and gold. Each $5.50, 10 for $50.

**MRS. AARON WARD.** Large double flowers of a distinct Indian-yellow shading lighter toward the edges. Very prolific. Each $1.00, 10 for $9.50.

**PREMIER.** A magnificent deep rose colored variety whose outer petals roll back broadly and produce beautiful lights and shadows. Each 95c, 10 to $9.00.

**RADIANCE.** A beautiful blend of carmine-rose with shades of opal and copper. Very vigorous and prolific. Each 95c, 10 for $9.00.

**RED RADIANCE.** A brilliant crimson sport of Radiance. Each 95c, 10 for $9.00.

**SENSATION.** A vigorous free-flowering double of a scarlet-crimson color. Each $1.00, 10 for $9.50.

**SUNBURST.** A beautiful sweet scented yellow rose strongly suffused with orange at the center. Each $1.00, 10 for $9.50.

**TEMPLAR.** Splendid long oval buds and very double globular fragrant crimson flowers which are particularly good early in the season and in the autumn. Each $1.00, 10 for $9.50.

**GRUSS AN TEPLITZ.** The intense depth of its velvety crimson red flowers and its free-flowering qualities make it one of the showiest garden roses. Each 95c, 10 for $9.00.

**SOUV. DE H. A. VERISCHUREN.** A beautiful two toned yellow, apricot at the center shading to a buff and brighter yellow on the outer petals. Its long shapely buds are fine for cutting and open out to delicate double flowers. A fine bedding rose; vigorous and fine. Each $1.20, 10 for $11.50.

**SOUV. DE CLAUDIUS PERNET.** Rich deep yellow blooms in profusion that hold their color well. The buds are long and pointed. The bush grows erect and branching with brilliant foliage. Each 95c, 10 for $9.00.

**SOUV. DE GEORGE BECKWITH.** A healthy vigorous grower with large globular flowers colored a deep yellow at the base and shaded to chrome yellow and shrimp pink at the outer tips. Each $1.20, 10 for $11.50.

With proper care Hybrid Teas will bloom all summer.
HYBRID-PERPETUAL ROSES

KRAU KARL DRUSCHKI A beautiful white whose bud is most attractive. Its full bloom is very delicate. Each $1.00, 10 for $9.50.

GENERAL JACQUEMINOT A rich crimson-scarlet free blooming variety of long standing. Each $1.00, 10 for $9.50.

GEORGE AREND's Beautiful pink sweet scented flowers; bushes vigorous and prolific. Each 85c. 10 for $8.00.

MAZNA CHARITA An early blooming variety with bright pink flowers suffused with carmine. Each 85c, 10 for $8.00.

ULRICH BRUNNER A bright cherry red variety; very satisfactory. Each 75c. 10 for $6.75.

CRIMSON BABY RAMBLER The original red flower showing slightly deeper shades. Each 75c. 10 for $9.00.

POLYANTHA AND BABY RAMBLER ROSES

These shapely compact bushes are very popular for bedding purposes, producing a profusion of small flowers continuously all summer and grow about 18 inches high.

ERNA TESCHENDORFF A very free bloomer bearing medium sized bright red semi-double flowers on plants 10 to 15 inches high. Each 75c, 10 for $6.75.

IDEAL Deep garnet red flowers, the darkest of all. A profusion of small blooms on large trusses. Each 75c, 10 for $6.75.

ORLEANS Trusses of comparatively large single geranium red flowers with white centers on a pretty bushy plant. Each 75c, 10 for $6.75.

CRIMSON BABY RAMBLER The original red flower showing slightly deeper shades. Each 75c. 10 for $9.00.

CLIMBING ROSES

Including the Famous Ramblers

These hardy twining varieties have found favor with many people because of their rare beauty and their ability to cover a porch trellis or rose arch. They occupy small space considering the amount of blooms they produce.

AVIATR BLERIOT A new delicate saffron yellow shaded apricot opening to a somewhat lighter tone; very fragrant. Fine glossy foliage. Each 75c, 10 for $7.50.

CLIMBING AMERICAN BEAUTY This climbing rose is the counterpart of the old time favorite bush variety and produces beautiful well rounded deep pink flowers in profusion. It deserves its popularity. Each 75c, 10 for $7.50.

CRIMSON RAMBLER The ever popular for-runner of all climbers so well known it needs no description. Each 75c. 10 for $7.00.

DR. VAN FLEET A beautiful flesh white variety whose flowers borne in large clusters are almost as large as many of the Hybrid Tea Roses. Each 75c. 10 for $7.00.

DOROTHY PERKINS This is unquestionably the most popular climber, trailing its beautiful shell-pink flowers over many thousands of rose arches, porch trellises and garden fences. Each 75c. 10 for $7.00.

PAUL'S SCARLET CLIMBER Its semi-double scarlet flower trusses and its deep green foliage won the gold medal of the National Rose Society Exhibition. It continues to bloom long after other climbers have dropped their petals. A beautiful new introduction. Each 75c. 10 for $7.00.

Planting and Care of Roses

When you receive rose bushes from us they will be carefully trimmed of all weak shoots and surplus wood, and the roots pruned back to give the best results.

In choosing the location for a rose bed a sunny place protected from the north winds is best. Heavy clay soil is best too, but roses will thrive in almost any soil. Bed should be dug out to a depth of 2 or three feet and then refilled with a mixture of well rotted cow manure mixed with the soil to a level 3 or four inches below the surface.

Press soil well around roots of roses and wet down thoroughly when bed is planted. It should be well drained of course. A light mulch will help to keep soil moisture in light soil.

Hybrid Perpetuals should be set about 24 inches apart. Hybrid Teas and Polyantha Roses may be set 15 to 18 inches apart.

Just before the leaf buds begin to swell in the spring, usually in March, you should remove part of the winter covering of your rose bed and as warm weather approaches remove more until it is all disposed of. Then the bushes should be carefully pruned.

Hybrid Perpetual Roses should be cut back to within 6 or 3 inches of the roots where the bush begins to branch. Hybrid Teas should not be trimmed so severely. Dwarf Roses need only slight trimming to keep them from becoming too heavy. Pruning well be rewarded by larger and more shapely blooms.

A mulch of strawy manure or leaves will help your roses, however hardy, to winter well. Six or eight inches of this held down with dirt, corn stalks or boughs will protect them enough.

In spraying for aphis use nicotine solution or kerosene emulsion. For leaf-eating insects use arsenate of lead. Bordeaux mixture will kill mildew. A little potassium sulphate will check mildew, used one ounce to three gallons of water.

Climbing American Beauty Roses are very attractive.
EVERGREENS stand for year-around beauty. Their verdure persists throughout the blighting cold of winter. They lend charm to a home in foundation plantings, in formal groups, in window boxes or as stately individuals on the lawn. Your home can be made more charming with the judicious planting of Evergreens around it.

Arborvitae Thuya

AMERICAN (Thuya occidentalis) This graceful erect pyramidal tree is the parent of all Arborvitaes. Its feathery foliage is of a soft green color and the tree branches from close to the ground. It is capable of being trimmed to almost any shape, hence it may be used for hedges or ornamental individuals. As the background of an evergreen group or foundation planting it is very striking.

Planting and Care of Evergreens

Spring planting season extends from about April 1 to May 15 and Fall from August 15 to Nov. 1 varying slightly in different localities and in different years.

We prune both top and roots ready for planting, and ship all evergreens with ball of earth surrounded with burlap sewed tightly around it to protect the roots. To plant them, dig the pit larger and deeper than the ball and sift some rich loamy soil in the bottom. Set tree in, burlap and all, so it is slightly lower than it stood in the nursery row. Pack the loose soil around it and tramp thoroughly. Loosen burlap at the top and cut it off or roll it back. Finish filling the hole with soil and pack well. Water so soil is well soaked, then cover around the tree with a mulch of well rotted manure or loose earth.

It's Worth More Than It Costs To Have It Planted

An artist never shows his picture with the rough edges showing. He always has it framed.

The house and the people in it are usually considered the necessary elements of a home. But how about the frame?

A tasty arrangement of plants, vines and shrubs will frame your home and make you even more proud that it is yours.

The limited space in this booklet does not permit many planting plans, but we will be glad upon request to help you in any way we can with your planting problems.

Regal Lilies are among the best of hardy lilies.

ROCK GARDENS are being popularized. The great variety of adaptations of the rock garden idea has developed forms all the way from a sunny garden spot to a shaded sylvan nook with a water pool or running stream. Each adaptation calls for suitable plants—plants that thrive in shady locations or broad sunlight as the case may be. The dwarf varieties and trailing ground covers have found new uses, and taller plants produce wonderful effects banked against a wall or background. Space here does not permit more than a brief mention, but if you are interested we can perhaps help you to supply a planting list of suitable plants for the location you describe to us.

The wonderful landscape effects produced with plants can best be gained by a junketing trip in the summer time. Perhaps you have taken many such trips already, but if not, the pictures in Better Homes and Gardens Magazine, Your Garden, etc., afford interesting views of plantings — interesting effects that are a feast for the eyes.

Whatever your plans may be regarding the landscaping of your home grounds, you no doubt appreciate the value of well-laid plans before ordering the materials or putting spade to earth to carry them out.

If you feel you cannot afford to buy all the shrubs and plants this year to carry out your entire plan, at least you can start by planning the layout, planting a part this year and adding to it year by year until it is completed.
